

Comrades.

October 1st, appointed by the UN as a Day of the Third Age, finds retirees from all over the world in a desperate situation.

The cause behind this situation directly lies on the capitalist mode of production, which keeps its ever-lasting patterns: anarchic, unfair, exploitative, classist and nowadays greatly strengthened after the temporary defeat of the socialist countries and therefore after the absence and demise of its fearsome, former adversary: the socialist mode of production and its daily basic scale rights conquered by the working class in these countries.

Following the settling of the International Union of Pensioners of Retirees three years ago, this October 1st has become a world day of struggle against exploitation, for the demands for a decent life based on the wealth produced by the working class in their own individual and collective working life.

We stand up for those rights and advances attained during the 20th century through fierce struggles and mobilizations of the working class around the world and with the support of the socialist countries. We intensify the worldwide struggles against our exploiters, the big capital, the International Monetary Fund, against the compliance of the yellow trade unions and the governments they so duly serve.

We participate and strengthen the class movement through the WFTU and the International Union of Pensioners and Retirees, with Organization, with struggle and for the overthrow of the capitalist system-

We oppose capitalist exploitation, its poverty and its imperialist wars spread all over the world.

In the 5 continents, on October 1, 2018
